Introduction

WISE (Web Inside, Smart Engine) is a product series developed by ICP DAS that functions as control units for use in remote logic control and monitoring in various industrial applications. WISE offers a user-friendly and intuitive web site interface that allows users to implement IF-THEN-ELSE control logic on controllers just a few clicks away; no programming is required. With its powerful and easy-to-use features, it will minimize the learning curve, shorten time to market and dramatically reduce the labor and cost spent on system development.

WISE-5801-MTCP supports an I/O expansion bus to implement various I/O functions such as D/I, D/O, A/D and D/A according to the XW-Board. In addition, WISE-5801-MTCP also supports Modbus TCP slave devices. Based on the connection ability with Modbus TCP slave devices, WISE-5801-MTCP can provide user more flexibility in application field.

WISE-5801-MTCP supports Modbus TCP/RTU protocol to make seamless integration with SCADA software available. It includes all advantages which WISE series controllers can provide. In addition, WISE-5801-MTCP provides data logger function with microSD card, it can record I/O channel value by event trigger or regular time period. The data files can be sent back by Email or FTP. WISE-5801-MTCP also features SMS sending function for alarm report and SMS command receiving function. All setting can be completed through browser.
